File System

Storing files (database)?

allFilesDb.php:

```
$allFilesDb = array(
        array("jpg", "./path/to/file", 150);
        array("txt", "./path/to/file", 100);
        array("png", "./path/to/file", 20);
);
```

createFile.php:

```
$file = array("type"=>".jpg", "path"=>"./path/to/file/, "size" => SIZE, "created" =>
DATE, "modificated" => DATE);
```

TODO

· Convert file sizes from KB

· Creation/Modification:
    · filemtime
    · filectime

.
$dirs = array_filter(glob('../root/*'), 'is_dir');
