What have we learnt and dealt?

Organization and TeamWork:

A big team for a big Project.

Dealing with inconveniences.

Git problems.

Unexpected delays.

PHP Savvy:

Structure of .phps and passing information.

Working with files.

Differences with JS.

Working with JSON files.

Combining JS and PHP.

Task Distribution

```
$firstStage = "Team Work" . "Peer Coding";
```

```
$secondStage = explode("task", $project);
```

```
    $Salva = $secondStage["style_and_search-bar"];
```

```
    $Tam = $secondStage["render-folders_and_left-bar"];
```

```
    $Jaime = $secondStage["file-preview"];
```

```
    $Gonzalo = $secondStage["file-selection"];
```

```
$thirdStage = implode($secondStage);
```

```
$fourthStage = filter_var($thirdStage, FILTER_VALIDATE_BUGS) .  
"Deliverables";
```

Thank you!

Hold your questions and let's see the code!
